

■ SAP S/4HANA · 2027

THE DEADLINE ISN'T THE RISK. THE **QUEUE** IS.

ECC mainstream support ends 31
December 2027. The real danger
is what happens when everyone
moves at once.

■ THE STARTING LINE

63%

OF THE ECC INSTALL BASE IS STILL PLANNING

Not migrating. Planning. Over the next 16 months, most of the SAP world tries to fit through the same door.

THE MATHS THAT WON'T MOVE

- **18–36 months** — a typical ECC to S/4HANA migration
- **16 months** — the runway left before support ends
- **10–20%** — the forecast spike in consulting rates in the final year

■ THE TALENT CLIFF

3x

DEMAND FOR S/4HANA TALENT VS SUPPLY BY 2027

Every programme has the same architecture diagram, and the same gap in it: the people to build it.

Technology roadmaps are
easy. Talent roadmaps
win programmes.
